

DISTRIBUTED WORKFORCE

TRACE³

MARCH 2021

WHAT IS IT?

Distributed Workforce technologies assist and enhance the workflow and communication of workforces that are dispersed geographically over a wide area. Distributed workforce solutions help teams operate as if they were working together in a traditional office setting, while keeping valuable company data secure.

WHY IS IT IMPORTANT?

Distributed Workforce solutions are especially crucial today as companies solidify their long-term plans to address remote work. Employees working outside of traditional workspaces still need to access company resources from remote locations and stay connected with other employees through various means of collaboration. Obtaining and utilizing the most efficient distributed workforce technology allows businesses to reduce overhead costs, increase their workforces' geographic diversity, drive company culture in a remote environment, enable productivity, and give employees a greater sense of flexibility.

APPROACHES

Enabling distributed workforces can be done in many ways but the primary methods include communication technologies such as messaging and web conferencing tools, work management solutions, messaging solutions and enterprise file sync & share services. The modern solutions for distributed workforce provide capabilities around visual collaboration, culture management, virtual office spaces, virtual events, virtual reality collaboration and virtual presence. The following are all of the key use cases identified for building a high performing distributed workforce.

COMMUNICATION PLATFORM

Communication platforms provide a chat room for a company allowing users to message employees directly or set up a chatroom for groups or teams. Instant messaging gives employees the ability to communicate quickly and effectively without the need to send an email.

ENTERPRISE FILE SYNC & SHARE (EFSS)

Enterprise file sync and share is a software solution that provides users the ability to sync and share files such as documents, photos, and videos with other employees, partners or customers. Typically, this is deployed as a SaaS solution, but can also be offered in an on-premises solution in order to satisfy security and compliance needs.

MOBILE DEVICE MANAGEMENT (MDM)

Mobile device management (MDM) solutions enable IT and security teams to implement policies to secure, monitor, and manage employees' mobile devices. This not only include smartphones, but also includes devices such as tablets, laptops and IoT Devices.

REMOTE CULTURE MANAGEMENT

Remote Culture Management tools allow companies to collect and monitor employee reviews, identify employee successes, and inspire proactive actions. These solutions are used by companies to better recognize employee sentiment, encourage company-wide acknowledgment of employee accomplishments, and promote meaningful events that improve the company's or employees' wellbeing or welfare.

REMOTE WORK MANAGEMENT

Work management software tools improve business results, team performance and team accountability by providing organizations capabilities to plan, track, organize, and review tasks. Work management helps improve processes, resource allocation and user collaboration.

APPROACHES

TELEPRESENCE & VIRTUAL REALITY (VR)

With augmented and virtual reality communication tools, participants from around different places can communicate and work together in real-time. Using these solutions, people will engage in the same simulated space by both chatting and writing, with each other participants, resulting in face-to-face meetings being possible regardless of geographical location.

VIRTUAL DESKTOP INFRASTRUCTURE (VDI)

Virtual desktop infrastructure is centralized solution that hosts desktop environments. It is a type of desktop virtualization that runs within individual virtual machines and is delivered over a network. These virtual desktop environments can be accessed through PCs, tablets and other thin clients.

VIRTUAL EVENT PLATFORM

To organize, support, and conduct multimedia activities, virtual event systems have a range of capabilities. These products help companies create immersive environments that have the same feel and value as in-person activities. As a result, interactive event networks are adaptable software tools for managing and hosting a variety of activities, including association gatherings, multi-session conventions, trade shows, and career fairs.

VIRTUAL OFFICE SPACE

To emulate a physical office room, a virtual workspace is a digital, simulated office space equipped with collaboration and communication tools. For remote teams that are unable to meet in person on a regular basis, virtual workspaces may serve as a collaborative hub. Although remote teams can communicate using internal communications software or video conferencing software, virtual workspaces provide structure and a context for interaction that would otherwise be lacking.

VISUAL COLLABORATION

Teams can interact and coordinate in real time using visual communication tools, which are hosted in scalable cloud-based environments. Simultaneous editing, whiteboarding, diagramming, screen sharing, sticky notes, commenting, labelled cursors, text chat, and video and audio conferencing are some of the collaborative features offered by visual collaboration solutions.

WEB CONFERENCING

Web Conferencing refers to a wide range of online collaborative services in which users can hold live meetings, conferences, presentations, and training over the internet. These solutions allow users to share voice and video chat simultaneously, often with the additional capabilities of screen and file sharing.

COMMUNICATION PLATFORM

Flock is a Communication and Collaboration App designed specifically for Teams looking for a faster and more efficient way to communicate. You can discuss projects, share ideas, and make decisions faster! Flock integrates with other leading apps making sure all your work efforts are unified.

Google Chat is a communication software developed by Google built for teams that provides direct messages and team chat rooms, similar to competitors Slack and Microsoft Teams, along with a group messaging function that allows Google Drive content sharing.

Teams lets you quickly pull together a team with people inside and outside your organization, chat with others to drive fast and inclusive conversations, securely share and coauthor documents, and iterate on projects. Customize Teams by adding fingertip access to shared notes, web pages, and apps. Use meetings and calling to collaborate in real time from wherever users are.

Slack is a collaboration hub that can replace email to help you and your team work together seamlessly. It's designed to support the way people naturally work together, so you can collaborate with people online as efficiently as you do face-to-face.

Make Collaboration Faster & Easier With Workplace. Sign up to Workplace from Facebook Now! Organizations Connected on Workplace Have Seen a 20% Increase in Frontline Task Efficiency. Team Organization. Multi-Company Groups. Group Calling. Live Broadcasting.

ENTERPRISE FILE SYNC & SHARE

Box is a leading Cloud Content Management platform that enables organizations to accelerate business processes, power workplace collaboration, and protect their most valuable information, all while working with a best-of-breed enterprise IT stack. Founded in 2005, Box simplifies work for leading organizations globally, including AstraZeneca, General Electric, JLL and Morgan Stanley.

Citrix Content Collaboration complements Citrix Virtual Apps and Desktops to deliver a complete mobile workspace. This combination gives IT the ability to reduce storage costs and increase the performance of file syncing in virtualized environments. Additionally, IT will be able the unique needs of accessing document repositories, including OneDrive for Business, in a virtual environment with a mapped drive in a Windows file system.

Dropbox is a leading global collaboration platform that's transforming the way people work together, from the smallest business to the largest enterprise. With more than 500 million registered users across more than 180 countries, our products are designed to help unleash the world's creative energy and establish a more enlightened way of working.

Google Workspace provides flexible storage options so you will always have enough space for your files. With centralized administration, data loss prevention, and Vault for Drive, you can easily manage users and file sharing to help meet data compliance needs.

SharePoint empowers teamwork with dynamic and productive team sites for every project team, department, and division. Share files, data, news, and resources. Customize your site to streamline your team's work. Collaborate effortlessly and securely with team members inside and outside your organization, across PCs, Macs, and mobile devices.

MOBILE DEVICE MANAGEMENT (MDM)

BlackBerry UEM delivers complete, unified endpoint management and policy control for your diverse and growing fleet of devices and apps. With its single management console and trusted end-to-end security model, BlackBerry UEM is designed to help you increase the productivity of your mobile workforce while ensuring the full protection of your business data.

Citrix Endpoint Management is a comprehensive solution which unifies client management and enterprise mobility management. Users have single-click access to all of their apps with the Citrix Workspace app, while IT can easily configure, secure and manage any device including desktops, laptops, smartphones, tablets and IoT devices.

Mitsogo Inc. is a leading provider of Endpoint Management and Security solutions. Hexnode MDM, the award-winning Unified Endpoint Management platform from Mitsogo has been helping organizations in 100+ countries stay agile and competitive in an increasingly mobile world. From SMBs to Fortune 500s, enterprises of all sizes have leveraged Mitsogo's prowess in device management to drive business productivity and compliance. Mitsogo's solutions adapt to the most complex of business environments.

Moving from mobile device management (MDM) and enterprise mobility management (EMM), IBM MaaS360 with Watson has evolved into UEM – delivering mobile security through an AI-infused, cloud-based, integrated platform. Whether you support a single operating system type or have a mixed variety of devices, IBM mobile security offers the most secure, productive and intuitive solution on the market, harnessing the power of AI technology to help you make rapid, better-informed decisions.

Ivanti Unified Endpoint Manager is proven, reliable endpoint and user-profile management software that is core to: 1) discovering everything that touches your network; 2) automating software delivery; 3) reducing headaches with login performance; and 4) integrating actions with multiple IT solutions.

MOBILE DEVICE MANAGEMENT (MDM)

By concentrating on Apple, Jamf provides a leading EMM solution that helps empower users with Mac, iPad and iPhone. With Jamf Pro for enterprises, Jamf Now for small businesses and Jamf Connect for identity management, we eliminate the frustrations with capability limitations of other platforms and provide power where it's needed the most – in the hands of IT and users.

Desktop Central is a major player in the field of unified endpoint management/unified management solutions, providing highly automated and integrated tools that significantly reduce the workload and empower IT teams to troubleshoot rapidly, improve productivity and security, and reduce costs.

Matrix42 Workspace Management makes corporate IT simple, cost-effective and secure. For IT staff and for users. Today's location-independent workers want future-ready, self-service digital workspaces. Therefore, they need authenticated access to workspaces across the world. May they be physical, virtual or mobile.

Unified endpoint management helps users be productive wherever they are while keeping corporate information secure. Learn about Microsoft 365's flexible management and security solutions that let you deliver protected mobile experiences on any device.

Securely deploy and manage corporate resources and apps on any device – mobile, PCs, wearables, rugged and IoT devices – with Workspace ONE Unified Endpoint Management, the technology that powers Workspace ONE, our integrated digital workspace platform. Workspace ONE UEM enables a modern management approach for IT and uniquely supports full PC lifecycle management (PCLM) of desktops – Windows 10, macOS and Chrome OS – right alongside mobile devices.

REMOTE CULTURE MANAGEMENT

Bonusly is the fun and easy way to engage all of your employees and improve retention and productivity at every level of your organization. Bonusly helps you celebrate everyday contributions and key milestones, automate time-consuming HR admin processes, incentivize participation in company initiatives, and offer digital rewards your employees will love.

CultureMonkey helps organizations across the globe build world class culture through highly engaged and motivated employees resulting in increased happiness throughout the ecosystem. Get employee feedback, measure happiness quotient and drive actions from inputs through personalised and industry standard web & mobile apps using best in class employee engagement templates and deep insights.

Fond is a global SaaS platform that seamlessly consolidates employee rewards and recognition processes into one easy-to-use solution. With Fond, employees and managers can recognize each other, redeem rewards, access exclusive corporate discounts, and measure success so HR departments spend less time managing programs and more time driving results.

Lessonly is powerfully simple training software that helps teams learn, practice, and do better work. We enable busy teams to get on the same page, stay ahead of change, and deliver amazing experiences to customers and prospects.

Peoplebox is an all-in-one software for Employee Engagement & Performance Management for your Remote & Distributed Teams, that enables HR leaders to build strong human connections, achieve best results and ensure retention for their remote workforce.

REMOTE WORK MANAGEMENT

Asana helps teams orchestrate their work, from small projects to strategic initiatives. Headquartered in San Francisco, CA, Asana has more than 75,000 paying organizations and millions of free organizations across 195 countries. Global customers such as AirAsia, AllBirds, Grab, KLM Air France, Sephora, Traveloka and Viessmann rely on Asana to manage everything from company objectives to digital transformation to product launches and marketing campaigns.

Trello is a free app that makes working on group projects as easy as using sticky notes on your whiteboard. Available on your phone, tablet, and desktop, Trello's drag-and-drop interface and visual way of organizing your tasks makes sure you always know what needs to get done and who's working on it. Whether it's your sales pipeline, new employee training program, a home renovation project, or even your wedding, Trello is flexible enough to make sure you're on top of all your important projects.

Basecamp is a real-time communication tool that helps teams stay on the same page; it's less for traditional project management tasks (e.g., resource planning and long-term scheduling). With to-do-lists, calendaring, due dates and file-sharing, Basecamp provides a way for teams to keep track of priorities and actionable items.

Clarizen delivers a cloud-based enterprise collaborative work management solution built on the vision of business agility. Clarizen's PPM solution adapts to business processes, facilitates purposeful collaboration and provides efficiency through powerful workflow automation. It is built for enterprises that need to respond faster to changing market conditions and execute efficiently against its business goals.

ClickUp is one app to replace them all. It's the future of work. More than just task management - ClickUp offers docs, reminders, goals, calendars, and even an inbox. Fully customizable, ClickUp works for every type of team, so all teams can use the same app to plan, organize, and collaborate.

REMOTE WORK MANAGEMENT

Friyay.io is the next-generation collaboration platform for remote and flexible teams. Friyay turns remote working into an engaging social experience, with flexible, customizable tools, integrated information management, and real-time collaboration - all in one platform.

Hive is a productivity platform that drives companies to work forward. Their productivity platform powers the fast pace at companies like Starbucks, Uber, IBM, and Netflix, and they are passionate about changing how people work and communicate. Hive aims to improve workplace productivity for companies of all types and sizes.

Mavenlink is the modern software platform for professional and marketing services organizations. It is the only solution that helps services firms establish an operational system of record that facilitates their business lifecycle, including key capabilities like resource management, project management, collaboration, project accounting, and Business Intelligence.

monday.com is a cloud-based Work OS, where teams create workflow apps in minutes to run their processes, projects, and everyday work. Teams shape their workflows and projects, code-free, with a platform that adapts to shifting needs quickly, liberates teams from manual grunt work, and connects teams in a collaborative workspace.

As a first step, we are blending much of your workflow into an all-in-one workspace. Want a task list? A product roadmap? A design repository? They are now all in one place. You can even customize your own workspace from dozens of LEGO-style building blocks.

REMOTE WORK MANAGEMENT

Planview makes it easier for all organizations to achieve their business goals. We provide the industry's most comprehensive solutions designed for strategic planning, portfolio and resource management, product innovation, capability and technology management, Lean and Agile delivery, and collaborative work management.

Scoro is an end-to-end work management solution that allows professional and creative services to control their entire workflow from one place. It helps to streamline work and eliminate routine tasks to ensure a business runs as smoothly and efficiently as possible – from sales right through to billing.

Smartsheet is a leading cloud-based platform for work execution, empowering organizations to plan, capture, track, automate, and report on work at scale, resulting in more efficient processes and better business outcomes. Smartsheet empowers collaboration, drives better decision making, and accelerates innovation for over 77,000 customers in 190 countries.

Workfront is a cloud-based Enterprise Work Management solution that helps marketing, IT and other enterprise teams conquer the chaos of excessive email, redundant status meetings and disconnected tools. Unlike other tools, Workfront is a centralized, easy-to-adopt solution for managing and collaborating on all types of work through the entire work lifecycle, which improves team productivity and executive visibility.

Wrike is the collaborative work management platform for market leaders. The Wrike platform helps organizations align work with the most important business objectives, create new efficiencies, and drive results. It brings out the best in teams by giving them a single digital workplace with all the tools, features, and integrations needed to manage, automate, and complete work at scale.

TELEPRESENCE & VR

MeetinVR

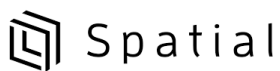

Meetin VR takes long-distance collaboration to the next level through Virtual Reality. Companies are now able to have professional meetings in virtual environments at any time, from anywhere.

Telepresence made easy. The Ohmni telepresence robot lets you be anywhere in the world in just one click. The new Ohmni Robot contains the highest resolution camera available in a telepresence robot. A 13MP camera plus the Ohmni low-latency encoding system gives you an immersive, ultra-wide field of view without sacrificing visual detail.

Video communications is growing dramatically as we continue to engage each other in greater numbers via live streaming, personal chats, and business conferencing. Personify is a team of video and AI specialists. We harness AI and machine learning technologies to help you create streaming, immersive video. Get real-time, studio-like functionality you can use from your desktop or laptop anytime

Spatial is a venture-backed Augmented Reality startup software company. We are building the foundational apps for AR as the next computing platform. The founding team has deep backgrounds in 3D user interfaces.

Virbela builds engaging virtual worlds for remote work, learning, and events. Founded in 2012 by a team of behavioral psychologists, Virbela's mission is to help organizations and people thrive in a remote-first future. With immersive 3D spaces that are deeply social and collaborative, Virbela brings business and in-person experiences to life online, while enabling remote teams to be more connected and productive.

VIRTUAL DESKTOP INFRASTRUCTURE (VDI)

Amazon WorkSpaces is a managed, secure Desktop-as-a-Service (DaaS) solution. You can use Amazon WorkSpaces to provision either Windows or Linux desktops in just a few minutes and quickly scale to provide thousands of desktops to workers across the globe. You can pay either monthly or hourly, just for the WorkSpaces you launch, which helps you save money when compared to traditional desktops and on-premises VDI solutions.

BlackBerry Digital Workplace offers "anywhere" secure access to any application, desktop and file. Employees, contractors and partners can use their own devices to access behind-the-firewall content, with many of the same capabilities they would have with a traditional corporate-owned and managed computer.

Citrix Workspace is the solution for streamlining work – it's a single, secure intelligent work platform that organizes, guides, and automates the most important information that people need. This speeds decision-making and collaboration in the context of work.

Itopia is a cloud-native automation and orchestration solution enabling desktop as a service (DaaS) on Google Cloud. itopia empowers enterprises to migrate VDI workloads to Google Cloud and rapidly deploy Windows virtual desktops and apps to workers on any device.

IGEL provides the next-gen edge OS for cloud workspaces. The company's world-leading software products include IGEL OS™, IGEL UD Pocket (UDP) and IGEL Universal Management Suite (UMS). These solutions comprise a more secure, manageable and cost-effective endpoint management and control platform across nearly any x86 device. Easily acquired via just two feature-rich software offerings, – Workspace Edition and Enterprise Management Pack – IGEL software presents outstanding value per investment.

VIRTUAL DESKTOP INFRASTRUCTURE (VDI)

Kasm insulates its users by creating a “chasm” between the user’s personal computer and web-born threats. The Kasm runs in a fresh, secure and isolated environment each use. A core principle of the Kasm environment is that it is disposable. With a click of a button all data is destroyed. Spin up a fresh environment whenever you like. Login to your Kasm from any modern web browsers.

Windows Virtual Desktop is a comprehensive desktop and app virtualization service running in the cloud. It’s the only virtual desktop infrastructure (VDI) that delivers simplified management, multi-session Windows 10, optimizations for Office 365 ProPlus, and support for Remote Desktop Services (RDS) environments. Deploy and scale your Windows desktops and apps on Azure in minutes and get built-in security and compliance features.

Frame is a Desktop-as-a-Service (DaaS) solution that lets you access your apps on any device and from any location. Easily create virtual workspaces for your teams, customers, or partners in under an hour.

VMware Horizon 7 is a solution that simplifies the management and delivery of virtual desktops and apps on-premises, in the cloud, or in a hybrid or multi-cloud configuration through a single platform to end-users. By leveraging complete workspace environment management and optimized for the software-defined data center, Horizon 7 helps IT control, manage, and protect all of the Windows resources end users want, at the speed they expect, with the efficiency business demands.

Workspot is an insanely simple, turnkey cloud service for securely delivering Windows 10 desktops, apps and workstations to any device from Microsoft Azure. We feature innovative, no-risk engagement contracts, free deployment services and flat rate subscription pricing – including Microsoft Azure infrastructure. Workspot Desktop Cloud allows secure virtual desktop deployments to happen on Azure in a day.

VIRTUAL EVENT PLATFORM

Bevy.com is a virtual conference and community events software platform. Bevy incorporates a variety of tools to plan, promote, and execute virtual and in-person events and is a flexible software solution that can be used to manage and host thousands of different types of community events. Built with enterprise level analytics, integrations and data security, the Bevy platform is used by a range of enterprise, consumer and education teams who want to build, grow and scale a global Customer-to-Customer (C2C) community.

Bizzabo is the only Event Success Platform. Bizzabo's all-in-one event software enables in-person, virtual, and hybrid events to deliver unique attendee experiences through intelligent and intent-based personalized engagement. We help companies measure, manage, and scale events towards key business outcomes. Our platform empowers every organizer, marketer, exhibitor, and attendee to unleash the power of events.

Hopin is the first all-in-one live online events platform where attendees can learn, interact, and connect with people from anywhere in the world. Hopin events are known for their full conference capabilities: stages, networking, breakout sessions (roundtables), sponsors, tickets, and analytics. It's all online—everyone can attend at no cost to the planet.

Livestorm is the all-in-one platform that enables companies to build powerful video communication strategies. Built for ease of use and collaboration, Livestorm adapts to all online event formats and allows teams to organize each stage of the event, from email promotion to analytics, in one place. With our browser-based platform, Livestorm is secure by design and allows event organizers and attendees to connect from any device with ease.

Splash is a platform championing the next era of event marketing by helping businesses market, measure, and scale their event marketing programs. From beautiful event pages and customized registration forms, to email follow-up programs and easy integrations with other business systems, Splash empowers teams across the organization to design on-brand, measurable, and compliant event marketing programs that deliver exceptional experiences and inspire quick action on attendee data.

VIRTUAL OFFICE SPACE

Gather is building virtual spaces for people to live and interact more effectively online. They're starting with a web-based video calling experience that serves the urgent needs of people today.

Knock is a virtual office platform enabling better connection, collaboration, and productivity. See, talk, share and work in real-time with distributed teammates.

A virtual office for remote teams re-discover the flow of working together in person. See, talk to, and collaborate with your team in one click.

Teamflow is a virtual office for your team to hang out in. Bring back the presence of being in the office, the energy of working in the same room, the spontaneity of hallway conversations – the joy of feeling like a team.

Wurkr's digital workspace provides an inclusive and diverse virtual environment targeting sustainable development. The world's most flexible and engaging video platform enables you to work online from anywhere in the world by supplying digital workspace solutions focused on well-being and connectivity.

VISUAL COLLABORATION

BeeCanvas is easy and flexible visual workspace. Most current tools out there opened only for tech-savvy startups. Still, Microsoft office eats real world and enterprises either. No matter how smart the product is, it's nothing if no one can use and access it. We obsessed with building a simple and easy, but very practical tool. Our mission is to democratize productivity and technology for the rest of us.

Bluescape creates collaboration solutions that help distributed teams perform their best—at work, on the go, and at home. Its virtual work platform empowers colleagues to see the big picture, make better decisions, and drive positive results.

Conceptboard is a collaborative online whiteboard used globally by teams as a shared, visual hub for cross-functional projects such as product development, design collaboration, agile project management and more.

Based on the concept of Oobeya, iObeya is an enterprise platform that virtualizes meeting rooms dedicated to all Visual Management practices. It offers a unique, life-like and immersive user experience, unlocking the constraints of paper for a seamless digital transition.

Lucidspark is a cloud-based virtual whiteboard where teams can work together creatively in real time. The intuitive digital canvas allows teams to effectively brainstorm, collaborate and align on new ideas, and organize collective thinking into actionable next steps.

VISUAL COLLABORATION

Milanote is an easy-to-use tool to organize your ideas and projects into visual boards. Add notes, images, links and files, organize them visually and share them with your team.

With more than 15M + users (and 95%+ of the Fortune 100), Miro is the online collaborative whiteboard platform that enables distributed teams to work effectively together, from running brainstorming sessions and workshops to planning projects, from designing new products and services to facilitating agile ceremonies.

MURAL is the leading digital workspace for visual collaboration in the enterprise. Teams depend on MURAL to understand and solve problems and build consensus using visual methods. More than an online whiteboard, MURAL enables innovation at scale by providing a platform for everything from product strategy and planning to leading immersive workshops using agile and design thinking methodologies.

Transform your meetings company-wide with Stormboard's innovative digital workspace. Save time by setting up your meeting beforehand, capture, organize, and discuss ideas in real-time, and then assign tasks for better results and monitor progress in a meeting space that you can return to again and again.

Whimsical is a unified suite of collaboration tools. Great for product specs, wikis, brainstorming, ideation, user flows, architecture diagrams and more.

WEB CONFERENCING

Adobe Connect is software used to create information and general presentations, online training materials, web conferencing, learning modules, webinars, and user desktop sharing. All meeting rooms are organized into 'pods'; with each pod performing a specific role.

BlueJeans is the meetings platform for the modern workplace and the first cloud service to connect desktops, mobile devices and room systems in one video meeting. Thousands of companies from growing businesses to Fortune 500 leaders use BlueJeans every day for video, audio and web conferencing meetings and large interactive events, so people can work productively where and how they want.

Cisco Webex is the leading enterprise solution for video conferencing, online meetings, screen share, and webinars. Web conferencing, cloud calling and equipment.

Google Meet is a video-communication service developed by Google. It is one of two apps that constitute the replacement for Google Hangouts, the other being Google Chat.

Fuze is a global cloud communications and collaboration software platform for the enterprise. Through an innovative and consumer-inspired unified experience, Fuze enables seamless transition between voice, video, messaging, and content sharing. Fuze empowers the digital workforce anytime, anywhere, and across any device.

WEB CONFERENCING

Highfive has reimagined meetings for enterprises. We've improved the ease and quality of in-room video conferencing, so teams are empowered to focus on what's important and get their best work done. Using web-based communication platforms and protocols, integrating with enterprise-grade workflows and external apps, and delivering crystal-clear audio from Dolby Voice® with Dolby engineered 4K wide-angle cameras, we're providing businesses worldwide with exceptional meeting experiences at affordable per-room pricing.

HUAWEI CLOUD Meeting leverages the cloud architecture to provide a secure and reliable conference service that features crystal-clear audio and HD video. This service allows you to hold internal and external meetings.

join.me is a collaboration tool designed to cut through pointless processes, politics and protocols with a single click. It helps you, your team and your company by making collaboration simple, instant and continuous.

Lifesize combines best-in-class, cloud-based video conferencing services with integrated equipment that sets a new standard for workplace communication and productivity on a global scale. Recognised as Frost & Sullivan's Cloud Video Conferencing Vendor of the Year, Lifesize leads the industry in customer satisfaction with the world's first 4K video conferencing solution and 4K service architecture, designed and engineered from its headquarters in Austin, TX.

GoToMeeting delivers a flawless experience from start to finish for both IT and end users. Shaped by thousands of customer conversations, the new GoToMeeting revolutionizes the way you communicate with features designed to save you time, so you can build stronger relationships and collaborate with ease.

WEB CONFERENCING

Teams lets you quickly pull together a team with people inside and outside your organization, chat with others to drive fast and inclusive conversations, securely share and coauthor documents, and iterate on projects. Customize Teams by adding fingertip access to shared notes, webpages, and apps. Use meetings and calling to collaborate in real time from wherever users are. Teams will simplify your access to Office 365 services and third-party apps to be the new center of gravity for your collaboration and communication needs.

Pexip simplifies complex video conferencing to empower teams to meet, regardless of location or technology. Our scalable, cloud-native platform enables high-quality video meetings, interoperability with Microsoft and Google solutions, and video system device registration. Customers can deploy Pexip on their own privately-hosted servers, in their own cloud subscription of choice (Azure, Google Cloud or AWS), as a hybrid, or as a service.

RingCentral is a provider of global enterprise cloud communications, collaboration, and contact center solutions. More flexible and cost-effective than legacy on-premises systems, RingCentral empowers modern mobile and distributed workforces to communicate, collaborate, and connect from any location, on any device, and via any mode. RingCentral provides unified voice, video meetings, team messaging, digital customer engagement, and integrated contact center solutions for enterprises globally.

StarLeaf brings people together through the power of video conferencing and calling. StarLeaf is a service provider with a global platform that delivers secure, reliable and rich video conferencing services to Fortune 500 companies all the way down to the smallest organizations around the world.

Zoom is the leader in modern enterprise video communications, with an easy, reliable cloud platform for video and audio conferencing, collaboration, chat, and webinars across mobile devices, desktops, telephones, and room systems. Zoom Rooms, the leading software-based conference room solution, features video and audio conferencing, wireless content sharing, and integrated calendaring running on off-the-shelf hardware. Zoom Rooms suit any meeting or collaboration space, from small huddle rooms to world-class training centers.
